Education

Shahid Beheshti University (Tehran, Iran)

2022 July
2020 Sept

Master degree in Information Technology (IT)

Studying and reviewing distributed systems and managing logs in these types of systems, learning patterns and advanced software architectures.

Institute for Advanced Studies in Basic Sciences (Zanjan, Iran)

2018 Sept
2014 Sept

Bachelor degree in Information Technology (IT)

Starting work in the field of designing and developing software systems and basic software architectures

Experience

MavaraTech Company (Tehran)

2022 Aug
2021 June

Mavaratech operates in the field of distributed systems development and API Management, and my collaboration with this company was for almost a year in the development of the log management and monitoring system for the main product of this company (Integropia). I also used technologies such as Spring, Splunk, Redis, etc. to develop this distributed system. In addition, for 4 months in cooperation with the first company, I conducted studies on the software system logs of this company, and based on that, I implemented the appropriate log management software.

Freelance

2020 Aug
2018 Dec

During this period of time, I conducted several studies and research on various architectures and advanced software patterns and also implemented some of these architectures (such as microservices architecture). During these studies, I designed store websites and content creation for some medium and small companies.

Behin Sayar Company

2018 Nov
2017 May

I started my first industrial experience, in this company by implementing the patient management software system in Abhar Hospital and after one year I started working full-time as one of the main back-end developers. During the development of several software systems for this company, I was trained in various technologies and got acquainted with various software program development tools. Some of the most important technologies are JavaEE, VueJs, Spring, NodeJs, MongoDB, PostgreSQL, etc.

Skills
